## Agfa Lucimeter S Light Meter & Case

This is the last of the Agfa Light meters, the Lucimeter S (previous models were the Lucimeter, Lucimeter II, Lucimeter M and Lucimat). This is a match-needle type with no scale on the face.

It uses a selenium cell so no batteries to deal with. Simple to use, just aim it at the subject and the needle moves. Then rotate the outer ring on the meter dial and the diamond-shaped needle moves. Move the dial so that the other needle is in the middle of the diamond shape. Then you can read the speed/aperture combinations in the lower half of the dial.

This item is in great working condition and comes with its own leather case and user manual.

Delivery to Mainland UK is at  
Standard Insured Courier Delivery Price up to 32 Kilos for Multiple Items
