## Metrovick Photo-electric Exposure Meter

British Made 1939

The Metrovick photo-electric Exposure Meter consists of a light-sensitive photocell, and a highly accurate and robust electrical measuring instrument which, is calibrated directly in exposures at F8 when using film rated at 23 Scheiner.

It is a double edged instrument with two scales, one 50 times as sensitive as the other, the change to the more sensitive scale being effected by merely by pressing a spring-returned button near one corner of the case. The two scales, one printed in red to avoid confusion cover from 32 seconds to 1/10 and from 1/10 second to 1/500 respectively.

Small sized (2 inch x 2 inch x 1¼ inch) this Lightmeter made by Metropolitan Vickers in Manchester England comes in its original pristine leather case and is fully working.

THE BRITISH JOURNAL ALMANAC (1939) ADVERTISEMENTS.

# THE ALL BRITISH EXPOSURE METER

The Metrovick photo-electric Exposure Meter consists of a light-sensitive photocell, and a highly accurate and robust electrical measuring instrument which is calibrated directly in exposures at f8 when using film rated at 23° Scheiner.

It is a double-range instrument with two scales, one 50 times as sensitive as the other, the change to the more sensitive scale being effected merely by pressing a spring-returned button near one corner of the case. The two scales, one printed in red to avoid confusion, cover from 32 seconds to 1/10, and from 1/10 second to 1/500 respectively.

A direct reading and adjustable conversion scale for use with other film speeds and apertures is mounted in the lid of the case, whilst a list of tested film speeds is included in the booklet supplied with the meter.

EXPOSURE  
METER

PRICE	-	£3 18 6
INCLUDING EVER-READY CASE		

The Metrovick Exposure Meter is manufactured throughout in Great Britain. It is 2 ins. by 2 ins. by 1½ ins. and weighs 6 ounces. A special pattern is available for use with Cine Cameras, in which the correct aperture is read for 16 frames per second, the conversion scale giving the aperture for other standard numbers of frames.

The Metrovick Exposure Meter is suitable for use with all types of film.

It gives accurate results also when used with incandescent electric lighting (gas-filled lamps or over-run filament lamp).
